(A)

Tighten locknuts 923358 until plate 1650713 and guide 1650712 are held firmly together. After assembly, rod assembly 1650715 must slide through guide 1650712 without binding.

(B)

To prevent internal damage to hydrostatic unit, hub of 1650392 link assembly must be supported while 916937 pin is being installed.

(C)

Roller must rotate freely after assembly. To obtain hydrostatic neutral adjustment, complete following steps.

(D₁)

Place control lever assembly 1650400 in neutral position on quadrant.

(D₂)

Loosen nut 916950 and rotate cam shaft assembly until center mark on cam aligns with center of cam roller 1650592. Retighten nut to secure adjustment.

(D₃)

Loosen Nut 913744

(D₄)

With unit running, rotate adjusting nut 1650872 until rear wheels stop turning. Retighten nut to secure adjustment.

(D₅)

Cycle control lever 1650400 from full forward to full reverse and back to neutral to check adjustment.
